Experience

ORION BUSINESS GROUP
Software Developer // October 2021 - Present

The Orion Business Group is a collection of businesses, technologies, and people dedicated to building solutions to humanity's biggest problems.

- Built multiple single page React apps for the renewal of business licenses/certificates with Stripe integration to boost sales.
- Designed, prototyped and built the onboarding flow for a person finance web/mobile app using Next.js and React Native.

GENERAL ASSEMBLY
Software Engineering Fellow // May 2021 - July 2021

General Assembly's Software Engineering Immersive is a 12 week long program that includes over 400+ hours of in-class professional training as well as an additional 200+ hours of self-study assignments. The program is dedicated to preparing students to think like engineers and approach problems creatively in order to build the next generation of web applications and digital products.

- Built multiple full-stack applications utilizing an array of programming languages and frameworks.
- Worked as part of a group to build a full-stack Express/React app utilizing git workflow.
- Attended lectures and labs for 8 hours/day and completed assignments after hours.
- Developed a solid understanding of core Computer Science concepts including data structures and algorithms.

THE WHITING-TURNER CONTRACTING COMPANY
Marketing Coordinator // September 2018 - April 2021

Whiting-Turner is the 4th largest contracting firm in the U.S. and provides construction management, general contracting, design-build and integrated project delivery services on projects large and small for a diverse group of customers.

- Responsible for proposals that resulted in project awards for multiple Fortune 500 companies.
- Managed all stages of the pursuit process including strategy, proposal preparation and client presentation in a deadline-driven environment.
- Responsible for strategizing and coordinating multiple proposals across various industries simultaneously.
- Developed brand identity for client deliverables.

General Assembly

BACHELOR OF SCIENCE, MARKETING
George Mason University

VERIFIED CERTIFICATE, CS50 - INTRODUCTION TO COMPUTER SCIENCE
Harvard University

Skills

LANGUAGES
JavaScript, TypeScript, Ruby, HTML, CSS/Sass, GraphQL

FRAMEWORKS
React, Next.js, React Native, Svelte, Express, Ruby on Rails, Node.js

TOOLS & PLATFORMS
Git, Netlify, Heroku, Firebase

DESIGN
Figma, XD, InDesign

Projects

CHATTER
A full-stack micro blogging application with user auth that allows users to post 280 character "Chats." A user can edit their Chats and respond to another user's Chats. Includes form validation on register/login forms. Built with a Ruby on Rails/PostgreSQL backend and a React/Next.js frontend.

MY TABLE
A full-stack application with auth that allows users to CRUD their favorites recipes. It utilizes a custom authentication server built with Express/TypeScript and Airtable as the database.

NEUZE
An application utilizing the NY Times api that allows users to search for articles, view the details of an article using a custom built modal and save articles to their local storage for later viewing. Includes form validation on the search bar.

Interests

Health & fitness, reading, cooking, learning
